Intellicom

INTELLICOM CONNECT · HARDWARE FOR YOUR ERP

Hardware that plugs into your ERP

Chosen, connected and supported by the people who run your ERP.

Customers buy scanners, printers, attendance terminals, phones and sensors from someone else, then struggle to make them talk to the system. Intellicom Connect closes the gap: tested South African hardware, set up and connected to your Intellicom products, and supported every month.

DEVICE TYPES

- Scanners and handhelds
- Receipt and label printers
- Attendance terminals
- Phones and tablets
- Cold room and power sensors
- ID card printers

Intellicom IT (Pty) Ltd · pmalan@intellicom.org.za · 087 378 1162 · WhatsApp 068 609 2769 · intellicom.org.za

THE RANGE

Pick the job, we do the rest

Stock and warehouse

Count it once. It is in the system.

- 2D barcode scanners, wired and cordless
- Rugged handheld computers for the warehouse floor
- Label printers and label stock

Retail counter and payments

Sell, print and reconcile in one place.

- Receipt printer, cash drawer and scanner at the counter
- QR and card payment options through your payment provider
- Connection of selected payment services to the system

People and attendance

Hours that reach payroll without retyping.

- Phone check-in with the person's location
- Face or fingerprint terminals, or card and PIN readers
- Connection of the terminals to Intellicom People

Field service, voice and fleet

Every call, ticket and vehicle in one place.

- Desk phones and cordless handsets on your phone system
- Rugged tablets for technicians
- QR tags that open an asset or a fault form

Cold chain and energy watch

Know before it spoils or stops.

- Battery sensors for temperature, humidity and doors
- Power and generator monitoring
- Tank and water level sensors

Print, ID cards and documents

Print what the system produces.

- Office printers on the network
- Label printers
- ID card printers, cards and ribbons

AN HONEST NOTE

Not every device connects without extra work

Not every Intellicom product needs hardware. Scanners, label printing, receipt printing, network printing and phone check-in work with the system as it is. Attendance terminals, phone call logging, sensors and capture devices need a connection that we build and test. We tell you which is which before you buy.

GETTING STARTED

How it starts

01

Free assessment

Thirty minutes. We look at your devices and your system and tell you plainly where we would start.

02

Written plan and quote

What is ready now, what needs extra work, and the cost, in writing before you decide.

03

Install, connect, test

We supply and set up the devices, connect them to the system and test with your own items and people.

04

We stay on

Monthly care keeps it working through updates, firmware changes and the odd failed device.

THE CONNECT SERVICE

We choose it, connect it and look after it

Chosen for you

Hardware tested for the job and supplied through South African distributors, quoted once together with the set-up.

Connected to your system

We connect each device to your Intellicom products, so a scan, a check-in or a reading lands where it belongs.

Tested with your own data

We try it with your own items, people and documents before we call it done, and train your team.

Looked after

Connect Care covers monitoring, updates and a help line, with the same helpdesk that looks after your system.

Book a free assessment

Thirty minutes: we look at your devices and your system and tell you plainly where we would start.
