Intellicom

INTELLICOM CONNECT · HARDWARE FOR YOUR ERP

Intellicom Connect Warehouse

Count it once. It is in the system.

Stock is counted by hand, receiving is typed in later, and labels are written or printed from a spreadsheet. We supply and connect barcode scanners, rugged handhelds and label printers to Intellicom ERP, so a scan lands straight in the stock screens.

MADE FOR

- Warehouses and stockrooms
- Wholesalers and distributors
- Retailers with a back store
- Manufacturers with raw material stock

Intellicom IT (Pty) Ltd · pmalan@intellicom.org.za · 087 378 1162 · WhatsApp 068 609 2769 · intellicom.org.za

WHAT YOU CAN DO

What is in the kit and how it works

01 2D barcode scanners, wired and cordless

02 Rugged handheld computers for the warehouse floor

03 Label printers and label stock

04 Set-up, testing with your own items, and training

05 A scanner works like a keyboard, so a scan goes straight into the stock screens of Intellicom ERP

06 Labels print from the item record through the ERP's own raw-printing route

INSIDE THE PRODUCT

In detail

What is included

- 2D barcode scanners, wired and cordless
- Rugged handheld computers for the warehouse floor
- Label printers and label stock
- Set-up, testing with your own items, and training

How it connects

- A scanner works like a keyboard, so a scan goes straight into the stock screens of Intellicom ERP
- Labels print from the item record through the ERP's own raw-printing route
- Handheld computers run the ERP in the browser, so nothing is installed on the device

What we do

- We choose the right kit with you and supply it
- We install it and connect it to your system
- We test it with your own data and train your people
- We keep it running every month with Connect Care

Good to know

- Floor scales and RFID tags need extra work and, for trade scales, approved equipment. Ask us before you buy either.

BETTER TOGETHER

Works with your Intellicom systems

- **Intellicom ERP**
- **Intellicom Shop**
- **Intellicom Books**

GETTING STARTED

How it starts

01

Free assessment

Thirty minutes. We look at your devices and your system and tell you plainly where we would start.

02

Written plan and quote

What is ready now, what needs extra work, and the cost, in writing before you decide.

03

Install, connect, test

We supply and set up the devices, connect them to the system and test with your own items and people.

04

We stay on

Monthly care keeps it working through updates, firmware changes and the odd failed device.

THE CONNECT SERVICE

We choose it, connect it and look after it

Chosen for you

Hardware tested for the job and supplied through South African distributors, quoted once together with the set-up.

Connected to your system

We connect each device to your Intellicom products, so a scan, a check-in or a reading lands where it belongs.

Tested with your own data

We try it with your own items, people and documents before we call it done, and train your team.

Looked after

Connect Care covers monitoring, updates and a help line, with the same helpdesk that looks after your system.
